

STICKERSLAB®

ABOUT US

StickersLab was founded in 2011, when Marco began his e-commerce activity working from his attic.

In the following years, StickersLab grew more and more. In 2015, Matteo joined the company, setting increasingly high targets for the brand.

In 2017, StickersLab became a Ltd. company. With the help of a young and determined team, the brand realized its initial dream: meeting people's safety needs by researching and designing innovative, high-quality products.

Ever since its founding, StickersLab dedicates itself to a constant and accurate selection of the best articles, in order to find the best existing solutions.

Today, thanks to a constantly evolving wide range of products. the company's activity has expanded all over the world.

OUR MISSION

Today, StickersLab is in constant research of new products and materials, transforming their measures, formats and variants. This way, the company can anticipate and meet all customer needs.

Our mission is to constantly enrich our catalog, thanks to the curiosity and passion of our hard-working team. Our customers' feedback also contributes to the creation of an ever-evolving range of products.

OUR BRANDS

ADESIVI SICUREZZA

Falling under the StickersLab brand, Adesivi Sicurezza was founded in 2011 with one goal in mind: the satisfaction of people's needs in the field of safety through researching and designing innovative, high-quality products.

The company dedicates itself to an accurate selection of the right products, in order to find the best and most customizable solutions.

FLUOSTYLE

FluoStyle is the youngest addition to the StickersLab brand and stands out thanks to the constant offer of phosphorescent and fluorescent solutions.

Born in 2014, its history brings out a constant evolution in terms of technology, sales, know-how, competence, quality and product recognition.

ADESIVI TASTIERA

Part of the StickersLab group, Adesivi Tastiera deals with the creation of keyboard stickers for both notebooks and stationary keyboards. The uses are multiple: from the many different world alphabets to specific kits for the visually impaired (i.e. low vision and nearsightedness), with letters up to 200% bigger than usual.
